

# John Muir Discovery Award

## Review

Name: Sophie

Date: 24.03.16

Discover: While we were in the forest we found a quiet place which we thought would be perfect for our Travelog. We found out that there were already lots of worms and woodlice in the area, so we decided our Travelog would be for insects and hedgehogs.

Explore: On the first day in the forest we went bug hunting and did some art, after this we played team building games, they were really fun and challenging! When we went back up to the forest on Thursday, we found Spiders and lots of worms in one of the bedrooms.

Conserve: When we found our area, there were lots of branches that needed cutting so some other people from the group and I spent a lot of time cutting and trimming the branches to make space for our Travelog. The people who I worked with Lola, Marnie, Lewis, Max, Etson and Keiron, it was a nice group because some of the people I hadn't worked with before, but we all got along and worked together really well.

Share: My favourite part of John Muir was playing the games, one of my favourites was penguins, and you have to fold the tarpaulin whilst staying on it with your group. The game was challenging but fun because it was really funny when you just have to cling on to the person in front of you or you'd fall off.

What I have learnt..... While in the forest I learnt about the different bugs and what habitat they have enjoyed bug hunting, I found lots of worms in the ground, some spiders hanging from the trees by spider webs and I found one woodlouse.

My next steps.... My next step would be to bring in some different tools and things to make our Travelog look even better. If we had more time our group could have chopped down some of the leaves to make some more room.

*I really enjoyed John Muir!*

*Thank you Mrs Moore and Mrs Waller!*
